REMARKS

Enclosed are copies of the six references cited in the International Search Report in the present application. Three of these references are also discussed in the introductory part of the specification. In addition, copies of U.S. Patents 5 4,716,573 and 5,515,369 are enclosed which correspond to EP 0 182 762A and WO 96/00467A, respectively.

The Examiner's attention is directed to the reasoned statement of patentability in the Preliminary Examination Report that finds the claims to meet the three standards of patentability. Favorable consideration is hereby requested.
